ABOUT US

Atlas Electric designs and manufactures portable substations and distribution equipment for each client's specific application. They are designed to be quickly and easily moved from one location to another with minimal downtime. Our substations and distribution equipment can be designed to incorporate any size transformers with any combination of voltages. We have worked with our customers worldwide from the high altitudes of Bolivia to the deserts of the Sahara and jungles of Ecuador to provide substations custom designed for dependable operation in any extreme environment.
